Course Website: astro150.org

Section Website: goo.gl/QeRBXm

Section Room: *Section AI:* PAA A210; *Section AE:* PAA A216

Welcome to AST 150! Here are a few reiterations of Dr. Smith's syllabus pertaining to section.

Office Hours: My office (B337) is in the Physics and Astronomy Building (PAB) on the third floor, look for the "B. Morris" tag next to my door. You can find me in my office on Monday and Wednesday from 3:00-4:00pm, or if those times don't work for you, send me an email and we'll find one that works. Office hours are your chance to get help with assignments, ask questions before exams, and learn more about astronomy. If you can not attend the hours at the times posted above, contact me and we will set up a time that works for you. Don't wait until the day before the test to ask a question – come to office hours!

Section Work: From Dr. Smith's syllabus: "*No late work will be accepted in section. Missing a lab will result in zero credit for that lab.*" Don't forget that your work in section counts for 30% of your grade in this course (more than either the mid-term or the final).
